

ROCKET PACK VIRTUAL WAREHOUSE MONITOR

The Virtual Warehouse Monitor allows a powerful alternative to normal warehouse reporting, giving unprecedented ease of access to information within the controlling SAP Warehouse Management System through an intuitive three dimensional graphical user interface (GUI). This surpasses the cumbersome list based analysis previously required to obtain an insight into the state of a warehouse situation. Instead allowing rapid conclusions to be drawn based on clearly presented, interactive information.

RAPID OPERATIONAL OVERVIEW AND ANALYSIS

An almost instant appreciation of the warehouse status, allowing operations managers to proactively manage, avoiding reduction in service without the need to perform slow list based data analysis.

STORAGE OPTIMISATION

Provides a quick and easy overview of storage utilisation, and allows for the rapid identification of storage optimisation opportunities.

IMPROVED WAREHOUSE AND RESOURCE EFFICIENCY

Trends can be quickly seen giving a powerful insight into the SAP Warehouse Management (WM) and Task and Resource Management (TRM) process design and supporting logic (e.g. stock placement strategies). This can be used to identify potential areas of inefficiency and provide a basis for continuous operational improvement. The process of optimisation of the TRM model can be greatly accelerated.

SENIOR MANAGEMENT COMMUNICATION

The VWM provides a powerful means of communicating operational information quickly and efficiently to senior management.

IMPROVED IMPLEMENTATION QUALITY

The VWM accelerates the TRM configuration and knowledge transfer by providing a quick and easy method of validating the logical modelling of the operational layout and is a key tool to the implementation team.

ACCELERATED KNOWLEDGE TRANSFER AND TRAINING

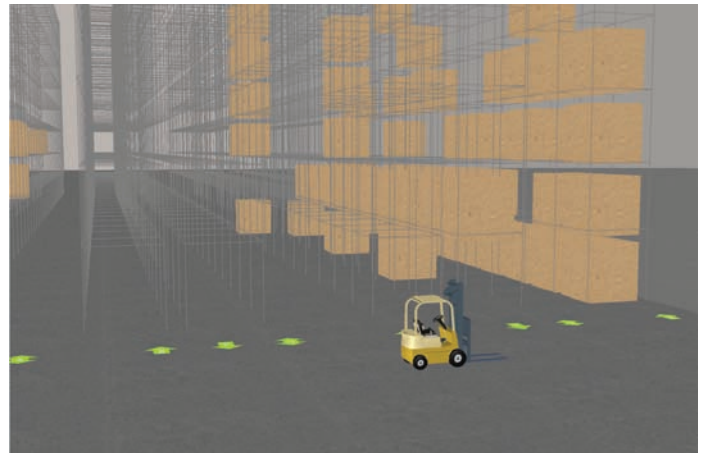

Process during an implementation substantially improves the speed and quality of knowledge transfer.

INTUITIVE AND EASY TO USE

VWM is accompanied by a simple point and click style interface. Most navigation functions can be performed directly via mouse requiring minimal keyboard usage.

REAL TIME INTERACTION WITH SAP

All information is presented to the user in real time with a typical warehouse being displayed in seconds. The currently displayed view of the warehouse can be saved to local or network hard disk for display when an active connection to SAP is not available.

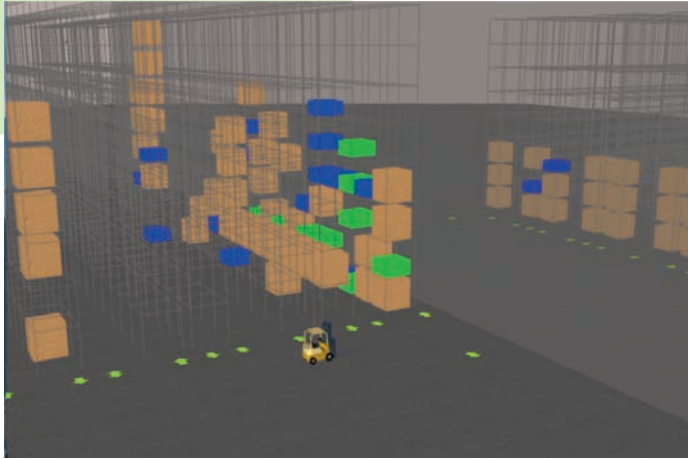

The Virtual Warehouse Monitor provides a powerful alternative to traditional warehouse reporting.

VIRTUAL WAREHOUSE MONITOR

Virtual Warehouse Monitor Reporting

CUSTOMISABLE

Certain aspects of any warehouse are unique, and as such VWM is designed allowing for localisation of fundamental warehouse

COMPATIBILITY AND SYSTEM REQUIREMENTS

The Virtual Warehouse Monitor is compatible with SAP R/3 4.6C, SAP R/3 4.7, SAP Enterprise Core Component (ECC) 5.0 onwards and SAP SCM 5.0 Extended Warehouse Management (EWM) onwards.

PC Requirements:

- ❖ Operating System: Windows XP (SP2) or Vista
- ❖ Processor: Dual core @ 2.4Ghz or higher
- ❖ Memory: 2GB minimum (4GB recommended)
- ❖ Graphics: Nvidia GeForce 6600GT equivalent or better.
- ❖ Additional Requirement: SAP GUI 640 or higher, one available USB 2.1 port and network access to SAP

INTEGRATION

Communication with SAP is performed using Remote Function Calls (RFC) enabled functions over a persistent connection.

INSTALLATION AND SETUP

PC installation of the VWM is by means of a windows installation wizard and takes only a matter of minutes to complete. SAP installation is carried out with the assistance of a Rocket consultant who will guide you through the process.

REPORTING POSSIBILITIES

VWM is delivered with a suite of essential reports that are designed to extend the standard SAP report offering to the next level. All reports are provided with an easy to use interface and present a three dimensional view of the results.

Some of the reports delivered with VWM are:

- ❖ Bin capacity and utilisation
- ❖ Workload analysis
- ❖ Putaway trend analysis
- ❖ Slotting preparation
- ❖ Shelf life expiry date management

New reports are being added with each release. Customer specific reporting requirements can be considered as part of the implementation process.

ABOUT ROCKET PACKS

Drawing on the collective the experience of numerous implementations into a variety of different business operations and an in depth knowledge of the SAP software, Rocket have developed a library of products and enhancements (Rocket Packs) to compliment and extend the SAP Logistics Execution, Warehouse Management and Supply Chain functions in order to meet to commonly occurring business and technical challenges. Developed following strict standards, including SAP approved enhancement techniques and development namespaces, and accompanied with user guides and online help, Rocket Packs are ready to deploy robust solutions that substantially increase business benefit while reducing implementation risk and cost compared to bespoke SAP development.

For further information and to learn how your business could benefit from the extended SAP functionality that Rocket Packs provide - **contact us and start your mission today.**
